

Skyvell

Professional Odour Elimination & Disinfection

IZAeffect - TOTAL DISINFECTION

Hydrogen peroxide has been used as a disinfectant for many years, as it is effective and in low concentrations has no harmful effects on human health and the environment. Hydrogen peroxide is highly reactive and reacts with all organic materials, including the biological membranes of bacteria, viruses and fungi. Therefore, it is an effective disinfectant against these organisms. Hydrogen peroxide can be used to disinfect the skin and various surfaces, and with cold evaporation it can also be used to disinfect entire rooms.

Our solution is your gain

As mentioned, hydrogen peroxide works very quickly but decomposes and loses its effectiveness, allowing any surviving organisms to start reproducing again. Therefore, we also added silver ions to the formulation, which enable longer-lasting antimicrobial action, as they remain on the disinfected surface. In doing so, we looked for a suitable silver complex that will not affect the stability of the peroxide, since hydrogen peroxide in the presence of free metal ions can begin to decompose rapidly. Silver citrate has proven to be the most suitable, and in addition, citrate ions also have a bactericidal effect. Solubility is problematic. We bridged this with pre-dissolution.

What makes IZAeffect different?

- Effective on molds, fungi, bacteria and viruses
- Biodegradable
- Safe for people, animals and the environment
- Smell - neutral

How safe is Skyvell?

- No hazard signs
- Non-toxic
- No solvents
- Biodegradable

IZAeffect silver line 3

IZAeffect silver line 3 is a disinfectant based on hydrogen peroxide. IZAeffect silver line 3 reacts with all organic substances, including biological membranes of bacteria, fungi and viruses. This makes it an effective disinfectant to combat all these organisms. IZAeffect silver line 3 comes as a solution ready for use. It is applied for disinfection of all kinds of working surfaces, floors, walls, equipment, machinery and appliances and for all kinds of routine cleaning operations where disinfection is required. Contains: hydrogen peroxide (30g/l)

Available: 100ml, 450ml, 500ml, 5000ml

IZAeffect green line 6

IZAeffect green line 6 is a disinfectant based on hydrogen peroxide. IZAeffect green line 6 comes as a solution ready for use. It is used primarily to destroy moulds, spores, viruses and other microorganisms. It is applied for disinfection of all kinds of working surfaces, mould affected surfaces, floors, walls, equipment, machinery and appliances and for all kinds of routine cleaning operations where disinfection is required. It is also applied for disinfection with mist and aerosol disinfection. Contains: hydrogen peroxide (49g/l)

Available: 900ml, 5000ml

IZAeffect nail anti-fungal

IZAeffect nail anti-fungal disinfection is a liquid disinfectant in spray form that is highly effective against fungi anywhere on the skin. The product is intended for overall personal hygiene and skin and nail disinfection. It is a superior product that contains hydrogen peroxide, which is stabilized with a special formula and decomposes into water and oxygen after being applied. IZAeffect nail anti-fungal disinfection is biodegradable, and there is no need to rinse it. It destroys fungi, bacteria, molds and yeasts.

Available: 100ml, 2x 100ml

The IZAeffect products are made with completely safe ingredients, thus they can be applied anytime and anywhere, even when children, pets and people with a weak immune system are present.

DECON

PROFESSIONAL AEROSOL DEVICES

3 in 1

DECON CLEAN

The mobile decontamination catalyst belongs to the group of machines used in laboratories, medical institutions, in research and in the production of pharmaceutical products. In addition, the device can also be used in business and private premises. The device is intended for use in combination with decontamination devices that use hydrogen peroxide for decontamination. It enables faster decomposition of the used decontamination agent.

Why DECON device?

- We prove the effectiveness of the disinfectant with DECON devices! Izaeffect disinfectant meets the special requirements for aerosol disinfection required by the Office of the Republic of Slovenia for Chemicals with standard EN 17272: 2020
- Using the Skyvell Natural Air Purifier liquid and DECON devices, your rooms will be finally free of bad odours leaving behind a natural scent of fresh air.

Trolley to make it easier to move DECON devices from one point to another.

DECON classic, professional & mini

DECON Classic/ Professional / Mini mobile decontamination generator is an independent ergonomically designed device that generates disinfection aerosol through the distribution system, which serves to disinfect the room in which it is located. Due to its simplicity and small size, DECON Classic is suitable for decontamination of rooms in pharmacy and healthcare, as well as in hotels, restaurants, nursing homes, office buildings, cars, trains, airplanes and other rooms where it is necessary to ensure an adequate microbiological level of cleanliness.

Use of DECON Clean - shortening of neutralization time

Skyvell

Well-being through fresh air

Odours affect our well-being more than we are aware of. Bad smells make us want to keep our distance, including from other people. When we feel comfortable somewhere, we want to linger. In the health care sector, bad odours occur regularly, caused by wounds and other bodily fluids. This often represents a challenge and is a difficult task for the nursing or cleaning staff in hospitals or rehabilitation clinics. Skyvell is reliable as it quickly and safely eliminates malodours. This approach helps to respect human dignity and enhance the patients' quality of life.

Our solution is your gain

Constant and recurring odours via human waste and open wounds are problematic. Skyvell effectively eliminates those smells pH-neutral on a molecular level and leaves a pleasant and subtle fresh scent. The fact that nothing is completely clean until the bad smell is gone, is true for every environment. Skyvell makes a vital contribution by effectively eliminating all kinds of bad odours and by ensuring that your patient feels comfortable.

What makes Skyvell different?

- Destroys odours instead of just masking them
- Natural product - no aggressive chemicals
- Safe for people, animals and the environment
- Subtle, pleasant smell - no masking fragrances

clove

lime

aniseed

pine needles

How safe is Skyvell?

- Non-flammable
- Non-toxic
- No solvents
- Biodegradable

Skyvell Gel

solves odour problems around the clock- Skyvell Gel is applied everywhere where odours occur regularly and tend to linger. In patient rooms, rehabilitation rooms, training rooms or common rooms as well as toilets/restrooms, the gel removes all malodours with a lasting effect. The functional wall mount unit ensures an unobtrusive positioning at the place of use.

Available: 250g jar, 250g refill pack and 10kg refill bucket

Skyvell Multi Use

for carpet cleaners, washing vacuum cleaners and as a washing additive for all types of textiles

Suitable for textiles subject to heavy wear with persistent odour. Ideal for bed sheets, linen and clothes up to carpets. Works efficiently against malodours such as faeces, vomit, urine, sweat, etc..

Available: 100ml, 250ml and 1l bottle, 5l refill pack, 5l concentrate

Skyvell Spray

for immediate and targeted odour removal- Ideal for patient rooms, hospital wards and common rooms. Nursing staff can apply it easily and targeted during their daily rounds. Use the Skyvell spray to destroy odours caused by urine, faeces, sweat, wound odours and other bodily fluids. Spray it on all surfaces such as furniture, sofas, wheelchairs, rehabilitation equipment, treatment tables and eliminate all bad odours quick and without leaving any residues.

Available: 100ml, 250ml and 1l spray bottle, 5l refill pack, 5l concentrate

The Skyvell products are made with natural and completely safe ingredients, thus they can be applied anytime and anywhere, even when children, pets and people with a weakened immune system are present.
